Public Right to Know Information

Item	Does this exist on WUTC website?	Other sources?	Any issues/limits with supplying data?	Ability to understand?
Incidents/Accidents	Pipeline database and some info on WUTC listserve and website.		Pipeline database used internally by staff. The more significant incidents are put on the WUTC listserve and website, which is an internal decision. Only jurisdictional/reportable incidents.	
Enforcement Activities	Yes, through WUTC Records Management System on the web.		Docket file becomes public after the complaint order is issued.	
Ownership	No	WUTC has kept track of this info since 1999 within a spreadsheet and more recently in the pipeline database.	Changes often. Info is not in a format that can be provided easily.	
Inspection (Intrastate only-Interstate is not posted to WUTC website)	Yes, through WUTC Records Management System on the web.		Docket file becomes available after the investigation is closed or the complaint order is filled. Documents available - Probable violation letter and report, company letter of intent, correspondence between staff and company, orders.	
Repair	No	Internal WUTC Records, located in various places, no central location, file, or database.	Info is not in a format that can be provided in one document. Most records/data for repairs are provided by the pipeline companies.	
Mileage	No	WUTC mileage spreadsheet and pipeline database.	Changes yearly and there is a time lag (mileage is reported for a calendar year every March).	

Public Right to Know Information

Item	Does this exist on WUTC website?	Other sources?	Any issues/limits with supplying data?	Ability to understand?
Basic Pipeline Info	Yes, but not in one complete report.	WUTC database, files, field reports, etc and maintained by pipeline companies.	Info is not in a format that can be provided in one document.	
Contact Info	Yes	Pipeline company websites?		
Maps	No	WUTC GIS, NPMS and commercial companies	Scale of the maps and how much detail to provide can be an issue. WUTC maps/data is not on the website, but can be provided if requested. In accordance with state law, companies are given 10 days notice before release. They may seek court order to protect records. Commercial companies charge for the map info.	
Spill Preparedness	No	State Ecology website	Some data is available via the web, more detail can be provided if requested.	
Safety Reports	Yes, there are links to current reports on WUTC website.	Most reports are located with DOT and NTSB with some reports on the web.	Reports are not released until the investigation is completed. The more recent reports are available via the web or can be requested (reports only go back a decade). Need a searchable database to look up older reports.	
Financial Data	No	WUTC annual reports and tariffs (economic regulation side of the WUTC-is not a function of the pipeline safety	Info can be provided from the WUTC is requested. FERC financial data is on the web, but the search function is too complicated.

		section) Federal Energy Regulatory Commission (FERC) website within Form 6		
Pipeline Mngt	No	Pipeline companies, WUTC does keep track of this in it's database since 1999, but the companies complete history is not on the WUTC website.	Can change often. Info is not in a format that can be provided in one document.	
Environmental Info	Yes	Ecology and FERC	Ecology website links to state Environmental Impact Statements. FERC website had info on projects by region.	
Emergency Info	Yes	Pipeline company websites, pipeline marker, or pipeline company mailings (along the right of way) API 1162 will also address this.	Not in a central location, must know something about the pipeline (gas or liquid, etc) or pipeline company name.	
Property Owner Info	No	Provided by counties? Disclosed by real estate agent at closing.	Potential buyers need a place to get this info before they decide to buy a house or property.
